Map Installation

1. Map Description

The 2D gameplay map has two sides, front and back, which run different functions respectively.

Running garbage sorting, color block sorting, and color block stacking functions requires this side.

Other gameplay, such as color block grabbing, stacking, and other fixed action gripping, requires this side.

2. Map Installation

Remove the two suction cups at the front of Dofbot, then align them with the holes on the map, pass the suction cups through, and then lock the suction cups to fix them in place, as shown in the figure below,
